

Kennedy Families,

It is our belief that everyone - students, families, and staff - has a critical role to play in the development of a strong and healthy school climate. We know that research consistently demonstrates that a positive school climate improves the quality of teaching and learning in the school, helps promote healthy child development, improves school safety, and strengthens relationships within our school. A strong and vibrant school climate can be developed and strengthened over time by understanding the thoughts, feelings, and experiences of members of our school community. ***It is our hope that you will take a few moments to fill out our School Climate Survey and provide us with your invaluable feedback.*** Surveys like this allow us to celebrate strengths, monitor changes over time, and respond to areas of challenge. Please use the link below to access our Kennedy School Climate Survey. Thank you in advance, we really appreciate your input.
